Personal Summary

- AI/ML Engineer with an MSc in Artificial Intelligence, experienced in building and deploying AI-driven applications using Python, LangChain, LangGraph, and Streamlit.
 - Built a BERT-based clustering model achieving 98% sentiment classification accuracy, alongside strong foundations in data processing, visualisation, and model evaluation across the ML lifecycle.
 - Skilled in workflow optimisation and analytics pipeline integration, translating raw data into clear, decision-ready insights.
-

Skill

Programming: Python

Version Control: Git, GitHub

CI/CD & Automation: Jenkins, GitHub Actions, CI/CD Pipelines

DevOps & Infrastructure: Docker, Ansible

Cloud Platforms: AWS (EC2, VM configuration & server management)

MLOps & Deployment: Streamlit, Heroku, Dockerized Deployments, Model Packaging

AI & Machine Learning: Computer Vision, Deep Learning, CNNs, Vision Transformers

Data Science & Analytics: NumPy, Pandas, Scikit-Learn

Development Environments: PyCharm, Google Colab, Jupyter Notebook

Projects

LLM-Powered AI Chatbot | Python, LangGraph, OpenAI, Streamlit

- Built a modular, data-driven conversational system with structured state management, supporting multi-turn communication similar to digital engineering workflows.
- Designed an interactive Streamlit interface, showing strong skills in digital tool deployment and stakeholder-focused interfaces.
- Implemented back-end data handling and processing logic, demonstrating transferable data engineering skills relevant to Digital Engineering.

WhatsApp Chat Analyzer | NLP, Data Analysis

- Processed, cleaned, and analysed unstructured datasets using Python to extract behavioural insights.
- Generated visualisations to communicate trends — demonstrating report creation skills similar to PowerBI dashboards for project teams.

AI for Social Analytics | NLP, BERT, KMeans

- Used BERT and clustering techniques to analyse large-scale text data and identify behavioural patterns.
 - Generated visualisations to communicate trends. Achieved 98% accuracy in sentiment classification and presented insights through visual summaries, mirroring digital reporting and model-based analysis used in engineering teams.
-

Education

MSc Artificial Intelligence, Brunel University London

Sept 2023 – Sept 2024

Key Modules: Artificial Intelligence, Machine Learning, Deep Learning, Predictive Data Analysis and Natural Language Processing

BSc Physics, University of Kerala

Jun 2018 – Jun 2021

Part-time Experience

Food & Beverage Assistant | Royal Air Force Club

Sept 2024 – Present

- Maintained high service standards while following strict procedures and workflows, improving attention to detail and process discipline.
- Coordinated effectively with team members during busy service hours, strengthening communication and teamwork skills useful in technical project environments.
